

Job Title: Practice Lead – App Dev

About CleanSlate

Founded in 2000, CleanSlate Technology Group is an Indianapolis-based IT consultancy uniquely equipped to build new cloud-native applications and modernize complex legacy applications. CleanSlate specializes in full-service modernization around Application Development, DevOps and Cloud Architecture. Our team is full of passionate and highly skilled cloud technologists that are empowered to solve complex problems every day, collaborating on great technical solutions that impact our customers' success.

Practice Lead – App Dev

CleanSlate is growing and will be adding a Practice Lead for our Application Development team. This position is responsible for management oversight of application development resources as well as participation in the delivery of custom software development projects. If you have experience as a technical or solution architect as well as experience leading and managing teams, this position may be a fit for you. The ideal candidate has several years' experience leading teams to build modern applications using both serverless and container-based AWS services. Candidate must thrive in a fast paced, forward-thinking work environment, be fully skilled in all phases of software delivery and have experience with resource management, utilization, and employee development.

As part of the CleanSlate Cloud Practice you will have opportunity to work closely with CleanSlate and Client technical teams to deliver mission critical solutions.

- Manage a team of technical resources to ensure effective deliver of consulting services.
- Collaborate and provide technical leadership to clients to leverage cloud services within our strategic Enterprise accounts.
- Represent CleanSlate in face-to-face client meetings and drive the overall delivery for the client.
- Build client relationships and represent CleanSlate as a thought leader for scalable next-generation cloud applications.
- Lead cross-functional implementation teams to deliver cloud applications to clients.
- Organize and provide training and development plan/opportunities for team members.

Responsibilities

- Provide management and direction for the team.
- Manage team resources and assignments to projects and tasks. Plan and execute resource management in a manner that balances employee skills and company goals
- Collaborate with senior management team to provide input to strategy, products, and team objectives.
- Develop team through mentoring and development plans and performance feedback.
- Lead teams to design and build modern, cloud-based applications.
- Provide input and estimates to create proposals
- Guide clients to ensure success in building and migrating applications, software and services following the principles of the AWS Well-Architected Framework.

- Help educate enterprise clients on the value proposition of cloud and participate in deep architectural discussions to ensure solutions are designed for successful deployment in the cloud.

Educational Requirements and Qualifications

- Overall, 10 years' experience in a software development role
- 2 years team lead, supervisor, or management experience
- 8 years of experience in the overall design and implementation of application solutions
- 3 years of experience designing and documenting cloud architecture
- 3 years of experience in the implementation of AWS cloud applications using serverless technologies, microservices architectures, and event driven processing
- Experience in facilitating design and working sessions with clients and technical teams
- Excellent oral and written communication skills interacting with a variety of audiences (CXO, architects, Management, and developers)
- Bachelor's Degree or equivalent experience

Preferred Qualifications

- 5 years' experience in a client-facing, sales-aligned advisory role such as a Consultant, Solution Engineer or Solution Architect
- Experience with key AWS services: EC2, S3, IAM, etc.
- Experience with cloud methodologies, frameworks, automation, and industry leading trends
